Bradycrotine Only a Headache Cure

Frey Carlos? Never!

By ALFRED BALCH. [CONTINUED. ?

Before the words left his lips Francesco had leaped with the girl in his arms. A soldier stationed at the water gate was able to tell that he had seen Don Francesco with a man and a boy pass through the gate about half past eight. They had taken a canoe at the landing and paddled down the bay, Beyond this he knew nothing, for if the Senor Don Francesco, the son of his excellency, chose to go out on the bay at night it was not his place to stop him. In his barge Don Alphonso visited one of the ong galleys lying at anchor, and before many minutes there were lights flashing from her which called the captains of the other two on board. No one had seen anything, for the passage of an Indian cance would not be noticed. Until daylight nothing could be done, but each man in turn gave orders, and the slaves were to be awakened at half past three. Anchors were hove short and everything was ready.

In the meantime Don Francesco had nurried to the little corner in which Nechtla had slept, waked her up and told her they must fly. The girl neither trembled nor made moan; her Indian blood enabled her to meet the crisis as coolly as though she had been expecting it for weeks. Dressed as she was in a boy's clothes there was but little to do, and Don Francesco lowered her down from the window into the little alley at the back of the palace. Then hurrying down himself he joined her; together they went to the little hut in the market where El Tigre slept and waked him. The three passed the sentry at the water gate, took possession of a canoe and paddling down toward the head of the island of San Juan, just below that of Carthagena, made their way out to sea through the Boca Grande (big mouth), the wide entrance to the bay, which was

blocked, in order to keep the buccaneers out, by sinking ships laden with stone across it. Reaching the ocean after a hard pull through the breakers they paddled off to the southwest. There was a chance for them among the Indians of Darien if they could survive the three let a little warmth go with her even into sail from the cloak Don Francesco wore, nsing two paddles to spread it, and then ying back in the stern of the canoe steered by the stars. The lovers sat in the center: What they said to each other as the boat forged lightly over the rolling sea I do not know, but I can

fancy they did not talk much. Bright and early as the first gray dawn showed itself the long black galleys began to move, their oars seeming like the egs of great water centipedes. On the largest, the Santa Ysabel, was Don Alphonso, Colonel Honradez and the Frey Raphael. During the night the captain general had walked up and down the deck, rejecting all offers of refreshment or a bed, and longing for day. He had caused the slaves to be informed that he who first sighted the canoe should have liberty, and, if he chose to settle in the country, a house and ground of his own. If he wished to leave Carthagena Don Alphonso pledged his word the man should be given every assistance. If a sailor sighted it he was to receive a thousand castelanos of gold. If an officer, he should be attached to the personal staff of the captain general. With such rewards to be won there was not a man on board, bond or free, who was not straining his eyes. The boatswains walked up and down the gangway between the rowing benches, but their whips were useless, the galley slaves were sparred to doing their best as the lash could never drive them. One of the callers crept slowly down the southern shore of the bay, while another examined the long stretch of the island of San Juan, the Santa Ysabel making her way rapidly down to the Boca Chica, to pick up what information she could from the little Indian settlement near Fort St. Paul. There was, however, no news to be got here; either the Indians had not seen the fugitives or they would not speak. Joined by her consorts, the Santa Ysabel rowed through the Boca into the open ocean, and by direction of Don Alphonso

the three spread out until they were

in signal distance only, and then sailed

America you will see that in making for Darien Francesco was running down the coast to the southwest, tion for a number of years get more whereas every stroke of the galley's thoroughly mixed, and turning over does pars drove them farther away from the | not change so much. Land in a state of cesco would be safe. danced merrily on and the lovers talked and laughed. With gentle insistence, the substance from the soil that they although with adoring eyes, the girl should. By loosening and mellowing up, asked her lover whether he was sure he was willing to give up all for her. She admired his rich dress and chatted softly as she nestled her head on his shoulder. Behind them was El Tigre, grim and watchful as he steered the cance, taking advantage of every breath of the light breeze which swelled the folds of their sail. Francesco raised the question of the reception they would meet

among the Indians of the Darien, one of the fiercest tribes of the main, and El Tigre told him, Nechtla being the pretty interpreter, they need have no fear. He belonged to the priestly caste and would find friends everywhere. Franthing like regret: he cared nothing for hands of the Inquisition and that grim Agricultural Epitomist. Money in Pecan Culture.

All day long they sailed, feeling no need of food. Far into the night they journeyed on until Francesco's eyes began to get heavy, and with Nechtla in his arms he sank to sleep. The iron man at the stern sat there still, watchful, alert, steering by the stars once more, and the canoe moved steadily on.

It was nearly ten o'clock that night when the signals flashed out from the Santa Ysabel and her consorts closed. Don Alphonso had made up his mind to sweep to the southward in the search, and the galleys formed in their triple order once more, moving slowly, owing to the difficulty of seeing at night. Toward one o'clock Don Alphonso yielded to the affectionate solicitation of Colonel Honradez and lay down on deck, wrapped in cloaks, to get some sleep. Daylight comes at four o'clock in Central America, and at the first streaks of dawn the three galleys were about five hundred yards apart, the Santa Ysabel in the center and perhaps one hundred yards behind. Two slaves, one on each of the foremost galleys, and Colonel Honradez, on the Santa Ysabel, saw the canoe about the same moment. Each slave received his freedom from the captain general. Don Alphonso waked and rushed for-

ward. Standing on the bow of the galley he saw Francesco rise when roughly shaken by El Tigre. His son looked around and saw the galleys coming diunder their bows as they were driven at full speed. He unbuckled his sword, to them than cotton. touched El Tigre, and pointing to the galleys laid it down in the canoe. Then he took the collar of pearls from his neck which had belonged to his mother and threw it over Nechtla's head. He kissed his hand to his father-they could see each other's eyes now as the sharp cries of the boatswains caused the slaves to back water and stop the rush of the galleysand then lifted Nechtla in his arms. He kissed her upturned face once, twice, and dian sitting motionless and a sword lying

El Tigre died under the torture, but he never spoke again, and Don Alphonso passed the record of even Spanish governors in his severity to the Indian tribes.

Flowers at Death Why should you carry white flowers to the house of death, save, indeed, it be a little child that has died? Is not death colder itself than any ice flower and whiter than any snow?, Why not bring crimson roses and pile them about those cheeks from which the roses have fied, that they may catch something of their oldtime glow? Why not lay claret carnations near those dear lips and heap blood-red poppies in the cold hands and on the colder breast that they may at least seem to press a little warmth there? And about that brow, that was for so long a time the home of a tender soul, put white narcissus blooms with their hearts of gold; and cover over the slender body down to the quiet feet with the wild pink roses that she so loved. Do not let your last remembrance of her be of something all white, all cold, but

Why Pianos Give Out. In musical colleges, where children beginning to learn practice for eight hours mostly on the middle strings, the piano wears unevenly and is quickly beaten out of tune. Exposure to damp air and draughts will cause the strings to rust and the keys to stick; hard and unreamay put a piano out of tune. The greatest abuse with which a piano has to contend, according to the best authorities, is the exposure to dry heat from furnaces and anthracite stoves. This causes the wood parts to shrink and the sounding board to relax and lose its power, the action rattles and the whole nstrument becomes inharmonious and discordant.-Interview in Seattle Tele-

The following is a translation of a Chinese joke: Two brothers cultivated the same plot of land. One day the eldest, on leaving to get the dinner ready, called to his brother to come with him. He, however, shouted out, at the top of his voice, "Wait until I have hidden my spade, and then I will come." While they were having their meal the other reproached him bitterly for this indiscretion. "When one hides a thing," said he, "one ought to preserve silence, or at any rate not speak above a whisper, for in shouting as you did just now one invites people to steal." Dinner over, the younger brother returned to the field, looked for his spade and found it gone. So running to his brother he

whispered invsteriously in his ear, "My spade is stolen!" The Object in Plowing. The chief object in plowing is to pulverize the soil and make it fine and mellow. All kinds of grain and vegetables require a mellow seed bed in order to secure the best results. But in many cases the condition and variety of the soil should be considered in determining toward Colon, or nearly due west. how and when the plowing should be If you will look at the map of South done. Some soils should only be stirred. and this is generally the case with new soils. Fields that have been in cultivaa larger per cent. of the plant's food in the soil is made available.

But in many cases it will be better to plow so as to stir the soil rather than to turn the surface soil under. A sandy ing deep, as it affords a better opportunity for the roots to penetrate through it. If the plowing can be done some time before planting, so as to give time for the newly turned soil to be acted upon by the sun, rain, snow and atmosphere, and then an implement is used that will stir the surface to the proper depth withcesco thought of his father with some- out turning under this soil, better results can be secured. This, accord-Southern States, some parts being well ing to present indications, is the source adapted to the growth of any and all from which a Third Party will spring. fruits or nuts that are grown west of the Rocky Mountains. A little history of what California has done and is now doing in fruit and nut culture may be rectly toward him, the water curling of interest, and stimulate the cotton States to grow something of more value

Thirty years ago very little attention had been paid to fruit culture in California, it being generally believed that State could only produce the mineral products, In 1890 the State Board of Trade of California report the value of wheat and flour products at \$19,327,-000, while they shipped 16,000 car loads fruits of all sorts, which aggregated \$19,858,000, over \$500,000 Don Alphonso cried out to him he would | more than the grain products, Fifteen give his consent. Before the words left years ago the attention of the people his lips Francesco had leaped with the was turned in earnest to fruit and nut girl in his arms, and all that was left culture, and the above is the result. A was a canoe rocking on the water, an In- result which the people of the Southern States can reach in less than fifteen years if they so will it.

Passadena, California, now has a population of about 5,000. In 1875 the land upon which the city now stands was beld at seven dollars per acre. In seven years, or 1882, the land was valued and sold in large quantities at \$500 to \$1,000 per acre, which was

planted in fruits and nuts. Within twenty years fruit and nut culture has brought land which the owner protested against being taxed seventy-five cents per acre to the present values of \$500 to \$1,500 per acre. Only lately have they commenced planting prunes in California, and there are now about 1.000,000 trees planted outside of the planting during the winter of 1888-89 In 1888 they produced about seven million pounds ; while the same year we imported 70. 000 000 pounds. They are now planting almonds and olives in addition to other products, both of which will earn them a mint of money.

Riverside, California, contains about 5,000 inhabitants. This valley, last days' trip. El Tigre rigged up a rude the grave. Ella Higginson in West year, produced, from 6,000 acres in orchard products, \$2,225,000. this, oranges were 1,800 car loads, while the raisin crop was estimated at \$450,000. Here we see the average earnings of 6,000 acres was \$370 per acre, which included oranges, prunes,

peaches, apricots, walnuts, etc., etc. The Southern States are nearer market by 1,000 miles than California, sonable pounding, which is not playing, and they can, in the same length of time or less, become equally wealthy. Let Florida grow the oranges and lemons, and the other cotton States take up other orchard products, any and all of which pay handsome profits.

As I said in my former article on the cultivation of the Texas Soft Shell Pecan, the developments which are being made, as I study of their value to the States east of the Rocky Mountains, are simply astounding; so much so that I am afraid to print the whole truth about the earnings of an orchard of the soft-shell pecan.

In my article I gave as the earnings at | campaign. But we had not expected to ten years, a half-bushel to the tree or find in him the scholar and the poet. \$189 per acre. In talking a few days ago with an old settler, he said that at ten years of age they will bear from tous and show an appreciative familiarifour to five bushels to the tree. These, ty with the immortal Robbie Burns and

4th. The assertion that the proceedings of the National Nominating Conventions were conducted in secret.

These items have been passing aroun for some time, and if Dr. Stokes has made any denial of them we have failed to see it. We wish also to say to the gentleman making the inquiry that, so far as we know, or can recall just now, there is not, with perhaps one or two exceptions, a single paper in the State that is unfriend'y to the Alliance. They are simply fighting the office seekers and politicans who are endeavoring to use the order to adavance their own selfish interests. That man, it matters not who he is, who, to promote his own personal ends, arrays one class of our people against another, is unchristian. undemocratic, and an enemy to institutions, the basis of which must rest on the confidence of man in man.

The Free Pass Again.

We have it from a gentleman, who is supposed to be in a position to know, that Gov. Tillman uses his free pass only when he travels on business connected with his office-business for the taxpayers of South Carolina-and that when he goes to his home in Elgefield or elsewhere on private business he pays

If this is so, the Governor actually him in office somewhere between \$500 and \$1,000. If he should ever rise to explain; it will be a genuine thunderclap from a cloudless sky. Tillman is making a first-rate Governor, and, as one who forme ly opposed his nomination, we are going to do what we promised-gave him credit for it.

Laying Aside Prejudice.

Famine in Russia.

The Pall Mall Gazette of Aug. 25 says that the Prince of Wales is taking great interest in the matter of the persecution of Jews in Russia, and in the This is a new industry, for only two not have expected from the rough cam- ality who are coming to England. Virginia convention says the representa-The Prince, the Gazette, says, has de tives in congress from the State must It is well, however, that some of the voted considerable time, to thorough understand that "unless they can agree Governor's quotations were veiled in the study of the question. Though he has to these demands they must give us culture is the fact that the tree has no Scotch dialect, or else they must have not taken any direct measures to assist something better." Everybody will rather embarrassed the bonny Scotch needy Jews, fearing that such action agree to that. If something better on his part would wound the feelings of than the sub treasury can not be found We cannot, of course, agree with Russians, he has indirectly given much we will all vote for it and then apply everything the Governor said, but taken assistance to the Anglo-Jewish commit- for a universal commission of lunacy to as a whole the address was an admira- tees.
